SALWA TANVEER CHOUDHARI

salwatc07@gmail.com

PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science and Engineering student specializing in Artificial Intelligence and Machine Learning at JSPM University. Familiar with C, C++, Java, and Python, with interests in computer vision, cybersecurity, and sustainability analytics. Planning an AI-based visual defect detection application and exploring other real-world AI/ML project concepts.

TECHNICAL SKILLS

Programming: C, C++, Java, Python
Areas of Interest: Artificial Intelligence, Machine Learning, Computer Vision, Cybersecurity
Planned AI/ML Tools: Anomalib, PatchCore, PyTorch, Streamlit, Scikit-learn
Project Domains: Visual defect detection, email encryption assessment, sustainability verification

SELECTED PROJECTS

AI-Based Visual Defect Detection System | *Planned AI/ML Project*
- Planned an image-based quality inspection app using Anomalib (PatchCore) to identify potential defects and display anomaly heatmaps.
- Proposed a Streamlit interface with image upload, anomaly score, inspection history, and report exports; development and testing pending.

MailShield AI / SecureMailScope | *SIH 2026 Project Concept*
- Concept for auditing email network captures (PCAP) to assess TLS/STARTTLS security, certificates, and session-level risks.
- Proposed Python-based analysis with rule checks, anomaly detection, risk scores, and prioritized security recommendations.

EcoTrust AI | *SIH 2026 Project Concept*
- AI-supported sustainability verification concept to identify potential greenwashing and assess supporting environmental evidence.

Dark Web Threat Intelligence | *SIH 2026 Project Concept*
- Concept for correlating public infrastructure signals, identity graphs, and language patterns to support cyber threat investigation.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML) — JSPM University | Second Year
Higher Secondary (12th) — Inspire College | 69% | 2025
Secondary School (10th) — Fr. Angel's Vidyankur School | 85% | 2023

INTERNSHIP EXPERIENCE

- Tiranex | Intern | 3 weeks
